

## Vauxhall Park Work Plan

**Note** – The work plan is ordered according to priorities identified through consultation. Items of work have been grouped within years to indicate related physical improvements that should be undertaken together, followed by supporting management and activities. Timing may vary dependant on funding. Items under management are those that are deemed feasible for delivery within present management systems. Activities are generally new areas of work undertaken by a range of people involved with the park.

It is recommended that upon receipt of the draft/completed management plan the Park Project Officer should meet with the Lambeth Conservation and Design Team to explain proposals and then submit an application for Conservation Area Consent. Any subsequent changes to detail can be dealt with by exchange of letter. Changes to buildings will require separate applications for Conservation Area Consent in addition to planning permission.
